

Please show respect to the people of the United States of America and do everything possible to STRENGTHEN decency restrictions on public airways. It is no reasonable to expect citizens to know in advance or anticipate times when we will be assaulted by anything offensive, whether is is a physical assault or a visual or audio assault. We have enough ugliness in our world; enough inappropriate material which should be left in the privacy of one's decency standards. Please don't steal away any rights which we have to be entertained by CLEAN entertainment. We've already lost so much over the years; it's impossible to watch any public TV without being offended already. Please DON'T MAKE IT WORSE!!! I appeal to you to employ the old adage: You know what is offensive when you see it and hear it. Don't make it common and acceptable. Don't make us scrape off any more filth. We're already covered with it.

Asking for the best,

Ted & Sue Wiggins
